Keeping Families Together

More than two million American men and their families are currently battling prostate cancer and three million more men will be compelled to join the battle in the coming decade.

Our goal is to keep these families together. We are in a race against time.
More than 13 years ago, the Prostate Cancer Foundation (PCF) was founded with a single mission: to harness resources – both financial and human – to find better treatments and a cure for recurrent prostate cancer, a cancer that was little known at the time. Back then, who knew that prostate cancer would become the most common non-skin cancer in America? Who knew that prostate cancer would strike one in six men? Who knew that a man would be one-third more likely to develop prostate cancer than a woman is to develop breast cancer?

Since then, the PCF has raised more than $260 million for prostate cancer research with the help of tens of thousands of generous supporters and corporate partners. We have funded hundreds of researchers in the United States and throughout the world in an effort to keep families together, longer. Despite the great progress, there is still much to do.

In 2005, prostate cancer took the lives of more than 30,000 fathers, brothers, uncles and husbands. One of those men was Mickey Tarnopol, a stalwart supporter and a member of our Board of Directors for 10 years. He was a beloved husband, father and grandfather. It is with him in mind, along with the more than two million American men and their families currently battling this disease, that we move aggressively toward fulfilling our mission. And, there is no time to lose. In 2006, baby boomer men will begin turning 60. At this age, men are entering the highest-risk zone for prostate cancer. As a result, the number of new cases in the United States over the next decade is expected to increase from 232,000 to more than 300,000 annually. That’s one new case every 100 seconds. We’re in a race against time to keep these men and their families together.

We can’t let time win.
Achievements

Looking back, we have much to be proud of, including many new initiatives and a dramatic increase in the resources invested in research, such as:

✓ Aggressively advocating for increased federal and state funding of prostate cancer research, helping produce a 20-fold increase in annual appropriations to $500 million.

✓ Funding 1,200 medical and scientific research projects from the United States and around the world through our Competitive Awards Program and Therapy Consortium.

✓ Sponsoring a one-of-a-kind annual Scientific Retreat for thought leaders in prostate cancer research, making it possible for the brightest minds in the field from academia, government and the biopharmaceutical industry to meet, share ideas and form new partnerships.

✓ Pioneering a streamlined approach to grant making, dramatically slashing the time it takes for researchers to apply for funding.

✓ Producing informational and educational publications to increase knowledge about prostate cancer nutrition and disease management for patients, physicians and other healthcare professionals.

✓ Working tirelessly with corporate partners and other prostate cancer advocates to raise awareness about the risks of prostate cancer and what men can do to spare themselves from suffering from this deadly disease.

Perhaps most significantly, there are now 13 FDA-approved therapies for the treatment of prostate cancer, compared to the seven that were available when the PCF was founded 13 years ago.
We would not have been able to achieve our many goals without the help of special individuals and businesses who provided extraordinary leadership in 2005:

- The PCF Board of Directors, friends and donors who supported our biennial New York Dinner, which raised $4.7 million.
- The 13,000 individuals who donated more than $20 million.
- Safeway, which raised a record $4.4 million from its annual point-of-purchase donation program.
- Neiman Marcus, which designated the PCF as the beneficiary of its famed Christmas Book.
- FORTUNE magazine, for its donation in honor of the magazine’s 75th anniversary and naming the PCF its “Charity of the Year.”
- Arnold Palmer, who chairs Arnie’s Army Battles Prostate Cancer.
- Major League Baseball, which partnered with the PCF for the eighth annual Home Run Challenge.
- The Republic of Tea, which developed a new product, MAN KIND TEA, in support of the PCF.
- Baume & Mercier, for its generous donation and public service announcements.
- Hugo Boss and Armani, for continued support through in-store events.
- Esquire magazine, for including the PCF in its exclusive Esquire House activities in New York.

Looking Ahead

In 2006, we already know there will be more innovative and promising prostate cancer research programs than we have resources to fund. We will need your help to provide as much support as possible so we can keep families together. We hope you’re encouraged by our progress and will continue to support the PCF generously.
Prostate cancer is the most common non-skin cancer in the United States, striking one in six men. In 2005 alone, more than 232,000 men were diagnosed with prostate cancer and more than 30,000 died. Over the past decade, nearly 350,000 men have been lost to this disease. The Prostate Cancer Foundation will continue to harness every resource available to help find better treatments and a cure for recurrent prostate cancer.

Risk Factors
We don’t know why this small organ, tucked inside each man’s pelvis just below the bladder, is so susceptible to cancer. But, research has shown that there are three major factors that increase a man’s risk for developing prostate cancer — age, race and family history.

• As men age, their risk of developing prostate cancer increases significantly, especially after age 60.

• African American men are 65% more likely to develop prostate cancer compared with Caucasian men and are twice as likely to die from the disease.

• Men who have one first-degree relative — a father, a brother or even a son — with prostate cancer are twice as likely to develop the disease, while those with two or more first-degree relatives are nearly four times as likely to be diagnosed.

Early Prostate Cancer Detection
Recognition of these risk factors enables men at higher risk to be extra vigilant about detecting prostate cancer at its earliest and most treatable stages. The PCF works tirelessly to identify other risk factors that might affect the risk of developing prostate cancer, develop ways to distinguish aggressive from indolent disease and predict which men will respond to which treatments.

Being diagnosed with prostate cancer can be a life-altering experience, affecting not only the man diagnosed, but also his spouse, children, other family members and friends. That is why the PCF’s mission to find better treatments and a cure for recurrent prostate cancer is a means to achieve our even more profound goal:

keeping families together.
This recent picture of my family demonstrates the full life I’ve been able to lead since being diagnosed. In May 1996 I was able to marry my beautiful wife, Julia, and soon thereafter, witness the birth of my two children, David Jr. and Mary Julia. And the family continues to grow! In this photo, Julia is carrying our third child, who is due in June 2006.

David N. Koch
Understanding Prostate Cancer

Just as no two men are alike, no two cases of prostate cancer are alike. Understanding how prostate cancer develops and spreads in each man remains one of the greatest research challenges. In 2005, the hard work and dedication of physicians and scientists around the world increased knowledge about this complex disease:

- A greater understanding of the strengths and weaknesses of the PSA (prostate-specific antigen) test as a marker for detecting prostate cancer development and progression has underscored the need for better ways to identify men at greatest risk for the disease, to predict those who are likely to need aggressive treatment and to assess the effectiveness of treatment strategies as the disease progresses.

- A growing appreciation for the complexity of managing men with advanced disease has sparked the development of new and novel treatment strategies, including therapeutic vaccines that boost the immune system’s ability to fight off prostate cancer cells.

- Recognition of the need for additional treatment options for men whose disease progresses despite treatment with existing drugs has led to the development of new chemotherapeutic agents that can destroy tumor cells and improve quality of life.

Continued efforts by dedicated Prostate Cancer Foundation researchers and physicians will undoubtedly yield even greater advances in understanding how prostate cancer develops and spreads and will help countless men enjoy longer, more satisfying lives with their families and loved ones.
After my diagnosis more than 11 years ago, Joan, my wife, and I decided to fulfill some of our lifelong dreams of adventure.

Our first trip was in 2001 to Africa, where we did valuable mission work for a children’s home. Following that, we visited Auckland, New Zealand, and climbed the Sky Tower, the highest freestanding building in the country.

My newest project, one that is dear to my heart, is building an authentic airplane from a kit. I’ve been a licensed private pilot for many years and with the help of friends, I plan to build this aircraft and later enjoy it with my family and friends.

Bob Each
Since its inception in 1993, the Prostate Cancer Foundation has enabled more than 1,200 physicians and scientists to proceed with vital research projects and contribute to improving the lives of millions of families worldwide. In 2005, 46 physicians and scientists were added to the ranks of PCF award recipients, a distinguished list that includes research scientists at almost all of the major academic medical centers.

The Competitive Awards Program
The PCF’s Competitive Awards Program remains a vital source of research funding for physicians and scientists each year. Its fast-track application process cuts the red tape that typifies many grant processes, enabling researchers to spend more time on their work and less on paperwork. Of the hundreds of applications received each year, awards are given to researchers whose projects are not only the most promising and innovative, but are also most likely to benefit men with prostate cancer quickly. The 25 to 50 applications selected each year represent the “best of the best” in prostate cancer research.

Yet, the PCF is compelled to turn down dozens of promising research projects each year. That is why the PCF needs your continued support to help fund more research.

For a complete list of institutions and researchers who have received funds from this program, see pages 32-36.

The Therapy Consortium
As an adjunct to the Competitive Awards Program, the PCF’s Therapy Consortium supports clinical-trial infrastructures at eight leading medical institutions to help conduct research more efficiently. Through this program, these institutions share research and clinical data, coordinate patient recruitment and process data results in a paperless, expeditious manner.

For a list of Therapy Consortium institutions and clinical investigators, see page 36.

The Annual Scientific Retreat
Regular ongoing dialogue among researchers and industry representatives is essential to research progress. In 2005, the PCF’s 12th Annual Scientific Retreat, the world’s foremost prostate cancer gathering, brought together hundreds of leading prostate cancer research scientists, biopharmaceutical executives and government policy makers to discuss the latest scientific advances and to identify ways to expedite the research process. The retreat featured three days of scientific presentations and intense dialogue about clinical data, new discoveries and policies to accelerate drug discovery and development.
In the months following my diagnosis, I was concerned over how many years I would have left with my beautiful wife, Shirley, and my family. Fortunately, with thorough research, Shirley and I have been successful in treating the disease. This year we’re celebrating our 55th wedding anniversary and have had the opportunity to attend annual reunions with fellow former junior high school principals across the nation.

My latest passion is cruising, and in 2005, Shirley and I took the trip of a lifetime on the world-renowned ocean liner, the Queen Mary 2. The trip was exquisite, allowing us to spend quality time with our family while also relaxing in the comfort of the open seas.
Bridging the Knowledge Gap

The Prostate Cancer Foundation’s progress to bridge the knowledge gap between researchers and clinicians and between clinicians and patients continued in 2005, promoting a dialogue among all three groups so that more men with prostate cancer have access to the newest treatment approaches and strategies.

Annual Prostate Cancer Symposium for Practicing Physicians

The first annual Prostate Cancer Symposium in 2005 was created to improve the dialogue between researchers and clinicians across the three key specialties – medical oncology, urology and radiation therapy. The program, co-sponsored by the PCF and the leading urology, radiation oncology and medical oncology professional associations, was designed to transmit the latest developments in prostate cancer research to practicing clinicians in a more rapid and timely fashion. This three-day symposium brought together more than 1,000 healthcare professionals and industry representatives dedicated to improving the lives of men with prostate cancer. It also highlighted the advances in all three treatment areas – surgery, radiation therapy and oncology – and the importance of having physicians in all three specialties coordinating the care for each man. Attendees discussed new and exciting clinical trial data and best practices that will continue to reverberate for many years to come.
I have always lived an active life, so continuing my energetic routine after I was diagnosed with prostate cancer was important to me.

Since my diagnosis, I attended a huge family reunion in August 2005 and the wedding of my youngest son, Steve, in October 2005. I also continue to fish and golf whenever I get a chance. My wife, Mary Sue, and I also helped celebrate the 40th birthday of our daughter, Susan, with her husband, Andy, and their sons, Ryan and Sean, in Nantucket Harbor in Summer 2004.
Building on the precedent set in 2004 with the publication of the first *Report to the Nation on Prostate Cancer*, the Prostate Cancer Foundation released two additional guides in 2005 to provide men with prostate cancer and their physicians the most current medical and scientific information in an easily accessible format.

*Report to the Nation on Prostate Cancer: Focus on Advanced Disease*, authored by leading prostate cancer physician-researchers, offers an in-depth look at the many challenging issues in the management of advanced prostate cancer. The discussions featured in the report enable community physicians and other healthcare practitioners to learn the latest developments in research and treatment strategies for men with advanced prostate cancer.

Recent feedback showed that men with prostate cancer at all stages of disease progression wanted more and better information about the most promising treatment options. To address this important need, the PCF published *Report to the Nation on Prostate Cancer: A Guide for Men and Their Families*, offering practical information about what to expect after being diagnosed with prostate cancer through the course of the disease. The publication includes user-friendly tear-out cards that summarize key points and questions to ask your doctor. After being covered by CNN, Reuters and National Public Radio, nearly 25,000 guides were distributed in just four months with additional copies requested every day.

Two other publications released in 2005 provide information about prostate cancer not only to men currently battling the disease, but to all men and women interested in the subject.

The newly updated *Nutrition and Prostate Cancer* describes how changes in diet and lifestyle can reduce the risk of prostate cancer development and progression and how to incorporate these changes into everyday life.

The brief *Introduction to Prostate Cancer* offers a general overview of prostate cancer and describes how the PCF is working to achieve its mission to find better treatments and a cure.
Bobby Smith – Prostate Cancer Survivor

Diagnosed: 2001

UCLA Retirement Party

Despite a successful collegiate football career at UCLA and five years playing in the NFL, nothing prepared me for the devastating news that I have prostate cancer.

But, thanks to advances in prostate cancer treatments, my family, friends and I celebrated my retirement from 32 years at UCLA in March 2004. Pictured, left to right, are Adrienne, my wife; me; Vanessa Smith and Pastor Edward Smith, my sister and brother-in-law; Henry Jackson, a longtime friend; and Althea Sidney, one of my three daughters. Althea and I posed with Joe Bruin, UCLA’s mascot!
Forging Collaborative Partnerships

Prostate cancer is the most common non-skin cancer in America, striking one in six men. It touches millions of families, every community, every corporation and every organization in this country. The Prostate Cancer Foundation has developed partnerships with many corporations and organizations to accelerate the efforts to defeat prostate cancer.

A world-class group of partners – including fashion retailers, professional sports leagues, media companies and more – are helping the PCF educate their customers and employees about the importance of this cause and expanding the community of people dedicated to the PCF’s mission. With their support, the PCF has raised more than $260 million, including more than $30 million in 2005 alone.

Examples of the PCF’s recent collaborations include:

**Fashion Partners**

In 2005, a lineup of major fashion retailers, both old and new, joined the fight by helping raise awareness and crucial funding for prostate cancer research. Neiman Marcus, one of the world’s preeminent specialty stores, selected the PCF as the beneficiary of its famed 2005 Christmas Book. News coverage on the *Today* show and other national media outlets helped promote the cause. Baume & Mercier, the prestigious Swiss watchmaker, donated generously to the PCF and created awareness with two public service announcements featuring actors Meg Ryan and Kiefer Sutherland. Hugo Boss and Giorgio Armani, leaders in the fashion industry, hosted in-store parties which benefited the PCF. Lastly, *Esquire* magazine selected the PCF as its official charity and supported the cause by publishing a prostate cancer advertorial encouraging leading men’s fashion companies and retailers to join the fight.

**Safeway**

In 2005, Safeway, one of America’s premier food retailers, raised a record $4.4 million for prostate cancer research through point-of-purchase promotions and opportunities to make donations at all 15,000 checkout stands in Safeway’s 1,700 stores throughout the United States. Led by Steve Burd, Safeway chairman, president and chief executive officer, this company-wide campaign has raised more than $12.5 million for prostate cancer research since its inception in 2001.
Being a lifetime golf competitor and enthusiast, my dreams were realized on Father’s Day in 2001. My daughter, Alicia, and I competed in our first-ever Father & Daughter Golf Tournament, and to our surprise, we won! Ten years ago, I wouldn’t have thought it was possible.

When I first learned I had prostate cancer, I thought the world as I knew it was over. But today, thanks to the many advances in prostate cancer treatments, I’m living in full remission, spending more time with my wife, Marsha, and traveling the world. Just two years ago, we took a fantastic trip around the world, stopping off in remote places like Tanzania and Papua New Guinea.

David Ederer – Prostate Cancer Survivor
Diagnosed: 1996
Father & Daughter Golf Tournament at the Seattle Golf Club
Grips for a Cure
In the time it takes to play 18 holes of golf, 18 men will lose their battle with prostate cancer. In 2005, Lamkin Corp., the premier maker of golf club grips, worked with the PCF for the second year to fight back and help keep men and their families together. Lamkin has made a goal to raise at least $150,000 annually for prostate cancer research.

Arnie’s Army Battles Prostate Cancer
The PCF is working with Arnold Palmer on Arnie’s Army Battles Prostate Cancer, a closest-to-the-pin contest on select par-3 holes at clubs around the country. Banners, posters, pin flags and other collateral materials carry the program logo and encourage golfers to join Arnie’s Army to help win the battle against prostate cancer. To date, Arnie’s Army has sponsored 1,300 events, raising more than $870,000 in the fight against prostate cancer.

Champions Tour for the Cure
Co-chaired by Arnold Palmer, Jim Colbert and Ray Floyd, Champions Tour for the Cure urges golf fans to pledge $1 or more for each birdie made by their favorite Champions Tour players throughout the season. Every birdie made between the MasterCard Championship in mid-January and the Charles Schwab Cup Championship in late October supports prostate cancer research. In 2005, the Champions Tour raised thousands of dollars for prostate cancer research.
Arnold Palmer – Prostate Cancer Survivor

Diagnosed: 1997
Granddaughter’s Wedding in Lake Toxaway, North Carolina

Good health has always been important to me, so being diagnosed with prostate cancer in January 1997 was a real shock. I wasn’t about to give up when I knew I had so much more to look forward to in life.

Eight years later, I married Kit Gawthrop at Turtle Bay Resort in beautiful Oahu, Hawaii, on January 28. Later that year, on September 10, 2005 (coincidentally, my birthday), my granddaughter, Katie Saunders, married Parker Spears at the family’s summer home in Lake Toxaway, NC. We, along with Kit and my daughter, Amy Saunders, are posing in front of, not surprising, another golf course.
In the time it takes to play **9 innings** of baseball, **9 men** will lose their battle with prostate cancer.

**FORTUNE Magazine**

In celebration of its 75th anniversary, *FORTUNE* magazine named the PCF its “Charity of the Year.” Recognizing the tremendous impact of cancer, *FORTUNE* dedicated two cover stories to the considerable challenges it presents. *FORTUNE* also made a generous contribution of $75,000 to the PCF and has donated advertising space.

**The Republic of Tea**

The Republic of Tea, the socially conscious premium tea purveyor, joined the fight against prostate cancer this year, with the introduction of MAN KIND TEA. Specially formulated with blueberries and green tea, this healthful brew gives men and women alike the opportunity to bring us closer to a cure. The Republic of Tea has already made a generous contribution to the PCF's urgent mission and will continue to contribute 75 cents from every tin of MAN KIND TEA sold.

**PCF Home Run Challenge**

For the past eight years, Major League Baseball and the Major League Baseball Players Association have teamed with the PCF to raise more than $22 million for prostate cancer research. Every baseball season during the week leading up to Father’s Day, the PCF Home Run Challenge raises money from fans and sponsors who make donations or pledge anywhere from $1 to $10,000 for each home run hit during approximately 60 selected games played that week. In 2005, the PCF Home Run Challenge added more than $1.9 million to the fight against prostate cancer.

In addition, FOX Networks, Horizon Media, Turner Broadcasting and Cablevision generously donated advertising space.
I became aware of the disease upon hearing the results of my early PSA tests and biopsy, performed in 1992. Prior to that, my father had undergone a radical non-cancerous prostatectomy. Since my surgery, my three brothers and I have all become aware of the risks and seek to raise the public’s consciousness about prostate cancer. We remain dedicated to supporting initiatives for early detection, response and protocols for treating this disease.

Despite the diagnosis, and the follow-up radical prostatectomy, my life has been incredibly rewarding, highlighted recently by serving my country as Ambassador to Finland for the past year and a half. The photo of my wife, Carol, and me was taken on a stroll in Helsinki last winter.
Each year, supporters of the Prostate Cancer Foundation come together with a common purpose: to keep families together by generating more funding so research can proceed more rapidly. The PCF is grateful to the individuals, families and corporations that dedicated their time and energy to help make this past year a success.

Highlights include:

**Hamptons Pro-Am Tennis Tournament**

In August 2005, the PCF hosted its first-ever Hamptons Pro-Am Tennis Tournament. The round-robin tournament, held at the East Hampton Indoor & Outdoor Tennis Club in New York, paired 20 amateur tennis players with legends of tennis and current players on the ATP tour for a weekend of competition, dinners and more. The weekend raised $376,000 and has become an annual event.

**Wynn Las Vegas Invitational Weekend**

Just months after opening the new Wynn Resort in Las Vegas, Steve and Elaine Wynn hosted the Wynn Las Vegas Invitational Weekend to benefit the PCF. The all-star weekend included a celebrity golf tournament, featuring Ray Romano, Greg Kinnear, Dennis Hopper, Ahmad Rashad and Joe Theismann, a performance by the Alvin Alley American Dance Theater, a special presentation by world-renowned jeweler Verdura and a celebrity poker tournament. The event generated more than $2.7 million for PCF research programs.
New York Dinner

In December 2005, celebrities, entertainers, business leaders and prominent New Yorkers attended the biennial PCF New York Dinner at the Waldorf-Astoria, raising more than $4.7 million for prostate cancer research.

Hosted by Whoopi Goldberg, with performances by Willie Nelson, Bill Cosby, Tracey Ullman, Marilyn McCoo and Billy Davis, the event honored music legend Quincy Jones and Ted and Dani Virtue for their continued support of prostate cancer research. We also remembered Mickey Tarnopol, a former member of the PCF Board of Directors, who lost his long and valiant battle with prostate cancer in 2005. Since inception, the New York Dinner has raised more than $23.5 million for prostate cancer research.

A Night to Remember

The annual A Night to Remember, hosted by Marvin Shanken, the editor of Wine Spectator, featured gourmet food, wines and a festive live auction, where rare wines and one-of-a-kind items were auctioned to benefit the PCF. Held at the Niebaum-Coppola Estate Winery in California, the event raised a record $1.7 million for prostate cancer research. Since inception, A Night to Remember has raised more than $5.7 million for prostate cancer research.

Golf Digest Celebrity Invitational

In celebration of its 55th anniversary, Golf Digest magazine hosted the Golf Digest Celebrity Invitational at the Riviera Country Club in California as a benefit for the PCF. Twenty-five celebrities, including Tim Allen, John O’Hurley, Patricia Heaton, Don Cheadle, Gary Sinise, Richard Schiff and Larry David, participated. Event sponsors Samsung, IZOD and longtime PCF supporter Callaway Golf helped raise more than $167,000 for the PCF.

Annual PCF Events

Every year, the PCF hosts events intended to engage donors and raise funds for prostate cancer research. In 2005, those events included the Carl H. Lindner Pro-Am Invitational Tennis Tournament ($1 million), Gourmet Games ($2,000) and Benefit at Bighorn Golf Tournament ($361,800).
In 2005, the Prostate Cancer Foundation was able to expand its donor base, increasing the number of donors from 4,500 in 2004 to more than 13,000 in 2005.

To achieve this level of growth and keep our donors informed of advancements in the field, the PCF expanded its communications efforts to include a newsletter called Progress, frequent website refreshes, email news alerts, science updates and announcements of new publications.

In addition, expanded public relations efforts also produced a dramatic increase in awareness and visibility for PCF programs. In 2005, the PCF secured more than 200 media placements, including leading publications such as FORTUNE magazine, Newsweek, The New York Times, The Wall Street Journal, The Washington Times and The Los Angeles Times.
The Tarnopol Fund

Mickey Tarnopol liked to say, “The more we give, the more we receive.” By his own standard, he must have received an abundance of life’s bounty because he gave so much of himself to so many. Mickey, a member of the Prostate Cancer Foundation Board of Directors for 10 years and a devoted supporter of the PCF, lost his battle with prostate cancer in 2005. Although he was diagnosed with the disease 12 years ago, because of medical and scientific advances, Mickey was truly able to live life during that time.

The PCF introduced The Tarnopol Fund, created in Mickey’s memory, at the New York Dinner in December 2005. It has already raised more than $400,000. Furthermore, Michael Milken will match these donations. The PCF will use these funds to support its programs at Memorial Sloan-Kettering Cancer Center in New York, where Mickey received his care.

Wade F.B. Thompson Matching Grant

Since surviving prostate cancer, melanoma and colon cancer, Wade F.B. Thompson, chairman, president and chief executive officer of Thor Industries, Inc., has dedicated his life to defeating cancer. In 2005, Wade made the first-ever Prostate Cancer Foundation Matching Grant, offering to match up to $250,000 from other donors. Thanks to many caring supporters, the PCF was able to surpass his goal with nearly 2,000 donors contributing $393,800. Wade generously gave an additional $100,000, making a total of more than $700,000 raised in this campaign.

The PCF immediately put these funds to use for the 2005 Competitive Awards Program, which supports innovative prostate cancer research projects. This program has funded many novel ideas for the diagnosis and treatment of prostate cancer and has spurred the development of new therapeutic strategies and drugs for use against prostate cancer.

In part because of the significant response to the Wade F.B. Thompson Matching Grant, the PCF was able to support more research projects. These contributions are playing an important role in sparking innovative ideas in drug discovery and development.
A Special Thank You

The Prostate Cancer Foundation would like to thank everyone who has supported us over the years. We gratefully acknowledge the following individuals, foundations, corporations and others who have given at least $5,000 since our inception.

The Prostate Cancer Foundation acknowledges the following sponsors who supported our work in 2005.

**Pharmaceutical, Biotechnology and Device Sponsors**

Abbott
Bristol-Myers Squibb
Novartis
sanofi-aventis
Varian Medical Systems
Research Awards

The Prostate Cancer Foundation’s Competitive Awards Program supports innovative, early-stage prostate cancer research projects. The following institutions and researchers have received funds from this program.

Albert Einstein College of Medicine
$75,000
Nicole B. Schreiber-Agus, Ph.D.

Assaf Harofe Medical Center (Israel)
$100,000
Amnon Zisman, M.D.

Bar–Ilan University (Israel)
$225,000
Shlomo Grossman, Ph.D.

Baylor University
$3,755,000
Jacques Banchereau, Ph.D.

Ben–Gurion University of the Negev (Israel)
$325,000
Ron N. Apte, Ph.D.

Beth Israel Deaconess Medical Center
$300,000
Lewis C. Cantley, Ph.D.

Brandeis University
$250,000
Lizbeth Hedstrom, Ph.D.

Brigham and Women’s Hospital
$690,000
Tony Junghans, M.D., Ph.D.

Burnham Institute
$1,888,666
Wadih Arap, M.D., Ph.D.

California Institute of Technology
$450,000
Raymond J. Deshaies, Ph.D.

California Pacific Medical Center
$100,000
Robert J. Debs, M.D.

Cancer Institute of New Jersey
$75,000
Robert S. DiPaola, M.D.

Cantonal Hospital St. Gall (Switzerland)
$75,000
Marcus Groettrup, Ph.D.

Case Western Reserve University
$350,000
Sanford Markowitz, M.D., Ph.D.

Cedars–Sinai Medical Center
$3,556,640
David B. Agus, M.D.

Children’s Hospital Boston
$900,000
Judah Folkman, M.D.

Children’s Hospital Boston
$900,000
Judah Folkman, M.D.

Cleveland Clinic Foundation
$150,000
Katerina Gurova, Ph.D.

Cold Spring Harbor Laboratory
$100,000
Robert Lucito, Ph.D.

Columbia University
$2,129,500
Allen Pavilion Presbyterian Hospital
Carl A. Olsson, M.D.

Dartmouth–Hitchcock Medical Center
$75,000
Marc S. Ernstoff, M.D.

Duke University
$1,100,000
Phillip Febbo, M.D.

Therapy Consortium

The Prostate Cancer Foundation’s Therapy Consortium supports clinical–trial infrastructures at eight leading medical institutions. The following clinical investigators that comprise the Therapy Consortium are among the most respected prostate cancer researchers in the United States:

Cedars-Sinai Medical Center
David B. Agus, M.D.
Research Director, Louis Warschaw Prostate Cancer Center

Dana-Farber Cancer Institute
Philip W. Kantoff, M.D.
Director, The Lank Center for Genitourinary Oncology and Chief, Division of Solid Tumor Oncology

The Johns Hopkins University, Sidney Kimmel Cancer Center
Michael A. Carducci, M.D.
Associate Professor of Oncology and Urology and Co-Director, Drug Development Program

University of California, San Francisco Cancer Center
Eric J. Small, M.D.
Professor of Medicine and Urology, Director of Urologic Oncology Research

University of Michigan Medical Center
Maha Hussain, M.D.
Professor of Internal Medicine and Urology

University of Wisconsin
George Wilding, M.D.
Director, Comprehensive Cancer Center; Assistant Dean for Oncology; Anderson Professor of Medicine

M.D. Anderson Cancer Center, University of Texas
William G. Nelson, M.D., Ph.D.
Professor of Oncology, Urology, Pharmacology, Medicine, Pathology and Radiation Oncology; and Co-Director, Genitourinary Oncology Program

Memorial Sloan-Kettering Cancer Center
Christopher J. Logothetis, M.D.
Chair and Professor, Genitourinary Medical Oncology

University of California, San Francisco Cancer Center
Howard I. Scher, M.D.
Chief, Genitourinary Oncology Service and D. Wayne Calloway Chair in Urologic Oncology

University of Michigan Medical Center
Kenneth J. Pienta, M.D.
Professor of Internal Medicine and Urology; Co-Director of the Urologic/Prostate Oncology Research Program

University of Wisconsin
George Wilding, M.D.
Director, Comprehensive Cancer Center; Assistant Dean for Oncology; Anderson Professor of Medicine
President Board

Gerald Ford

Jimmy Carter

George H.W. Bush

Bill Clinton

Board of Directors

Michael Milken
Founder and Chairman
Prostate Cancer Foundation

Charles F. Baird, Jr.
Managing Partner
North Castle Partners

Sarah Z. Evans
Vice President, Communications
Dear Friends,

Now in its 13th year, the Prostate Cancer Foundation remains resolute in its commitment to find better treatments and a cure for prostate cancer. We are proud of the acceleration of research into prostate cancer over the last decade, and, thanks to all of our efforts, some of the brightest minds in cancer research are now focused on prostate cancer.

The PCF is committed to harnessing the resources needed to defeat prostate cancer before it robs us of our fathers, uncles, husbands, brothers and sons. Gifts of support to the PCF come from many thoughtful and caring people, some of whom have been touched by prostate cancer, like me, and others who know that in time all of us will be touched by it. We have made measurable strides, but we’re in a race against time to keep men living longer. We won’t let prostate cancer win.

With your help, we will achieve a better understanding of why so many men get prostate cancer and why it is life threatening to some men and not to others. With your help, we can continue to fund the best researchers to identify new drugs and to accelerate clinical trials to get these drugs into men faster. With your help, we can improve testing so that men can make better decisions about their treatment.

Your support is important to us. Please act now.

Yours sincerely,

R. Christian B. Evensen

Director, Research Committee
Prostate Cancer Foundation Board of Directors
The Prostate Cancer Foundation welcomes gifts of cash, securities, non-cash assets and gifts by Will or Living Trust. We also welcome contributions made in memory, in tribute or in honor of friends or loved ones.

Donations
Please mail your check to:

Prostate Cancer Foundation
1250 Fourth Street
Santa Monica, California 90401

To make an online contribution, please visit our website: www.prostatecancerfoundation.org

To make a credit card donation, call 800.757.CURE (2873).

Memorial or Tribute Gifts
Honor the memory of a loved one or celebrate the accomplishment of a friend or family member by helping others.

Make a memorial or tribute gift and the PCF will send an acknowledgment card to the family or honoree.

Other Gift Suggestions
Assets or property including appreciated stock and real estate.

Bequest – Include a gift to the PCF in your Will.

Name the PCF as the primary or contingent beneficiary on a life insurance policy.
